Please join to for an update for the on going floodplain study efforts being complete by Bastrop County with the awarded Texas Water Development Board Flood Infrastructure Fund Grant for the Big Sandy Creek, Piney Creek, and Yegua Creek watersheds shown below.

The floodplain study has defined the existing condition flood risk with in the Big Sandy Creek, Piney Creek, and Yegua Creek watersheds. These floodplain results have been used to identify areas with high risk of flooding during storm events. Public feedback is requested on the existing condition floodplain limits to help guide further efforts to identify proposed flood mitigation projects, with the goal of reducing flood risk and improving safety for residents in these watersheds.

Questions about the study can be directed to Carolyn Dill, P.E., Consultant Bastrop County Engineer, at (512) 581-7180 or by email at carolyn.dill@co.bastrop.tx.us
